

CARLSONInvestments

Monthly Report

CARLSON INVESTMENTS SE

For the period from 01.05.2023 to 31.05.2023

The Management Board of CARLSON INVESTMENTS SE with its registered office in Warsaw, Poland (hereinafter referred to as the Issuer, the Company) submits the enclosed monthly report for May 2023.

Legal basis: pt. 16 of the Appendix to Resolution No. 293/2010 of the Management Board of the Warsaw Stock Exchange of 31.03.2010. "Good Practices of Companies Listed on NewConnect".

Person representing the Issuer.

Aleksander Gruszczynski - Chairman of the Board

Warsaw, June 14, 2023.

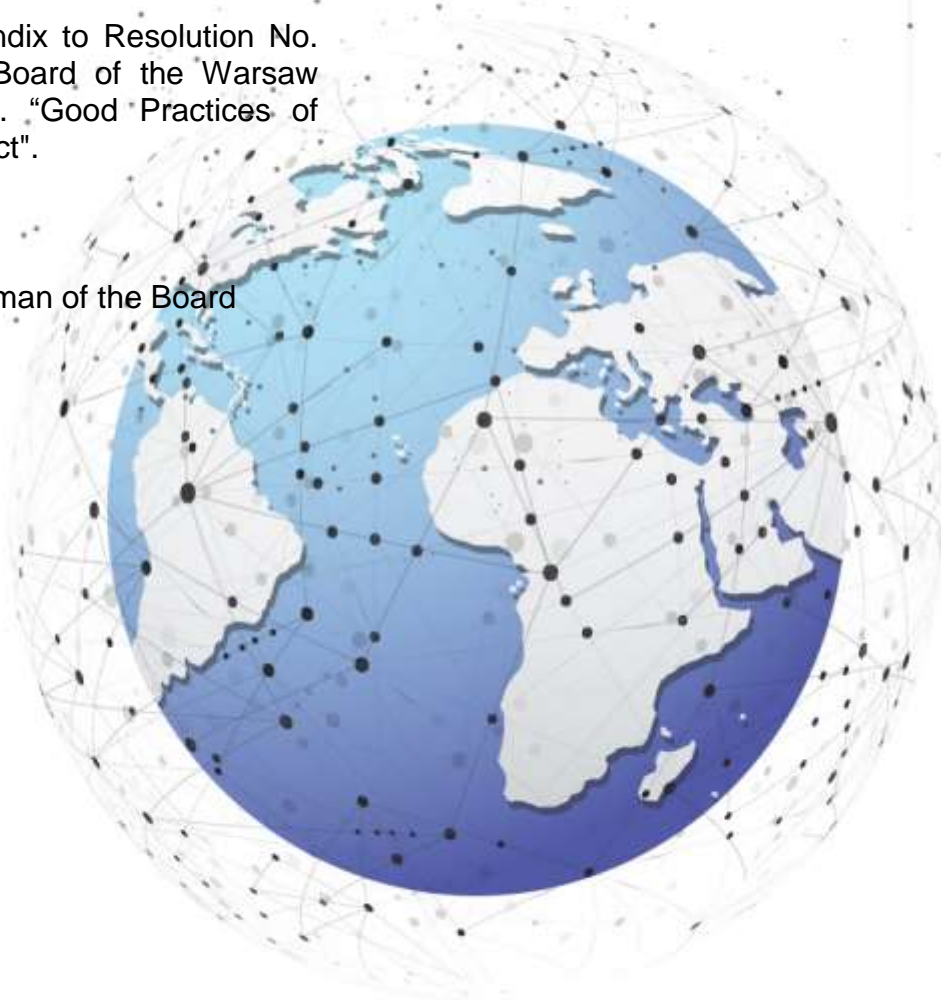

TABLE OF CONTENTS

1. Description of trends and events in the Issuer's environment,
2. List of reports published by the Issuer in May 2023,
3. Information on the achievement of issue objectives,
4. Investor Calendar

CARLSONInvestments

1. DESCRIPTION OF TRENDS AND EVENTS IN THE ISSUER'S ENVIRONMENT

[CARLSON INVESTMENTS SE](#) (hereinafter: "Issuer", "Company") is the entity at the head of the CARLSON INVESTMENTS SE Group. As the "parent" company, it focuses its activities on the optimal management of its subsidiaries and on providing them with support for their operations. The Issuer also supervises and implements the adopted development strategy of the Capital Group.

Currently, the CARLSON INVESTMENTS Group structure includes the entities indicated below:

Carlson Investments Alternatywna Spółka Inwestycyjna S.A. specializes in investments in Companies and entities with high growth potential, often based on research and development projects and having proprietary technology in areas such as medtech, fintech and biomedical projects. The Company also conducts its business with an eye on foreign markets.

www.techvigo.pl

Techvigo Ltd. is an IT market technology company operating in its current form for 11 years. It specializes in IT solutions for Cyber Security, logistics, tourism, and other industries. It is a producer of many software tools implemented on behalf of corporate clients in the Polish and foreign markets. It has in its assets the largest map resources of Poland. The main standard product lines of Techvigo Sp. z o. o. are the Tourdesk-CRM system for tourist agencies and map products from the Navigo line. On 02.03.2023, Techvigo sp. z o.o. was entered in the register of virtual currencies activities conducted by the Tax Administration Chamber in Katowice under the number RDWW-657. The subsidiary can perform the following activities: exchange between virtual currencies and means of payment, exchange between virtual currencies, intermediation in exchange referred to in point.12 a or b, as well as maintaining the accounts referred to in paragraph 17(e) of the Law of March 01, 2018, on the prevention of money laundering and terrorist financing.

Gaudi Management S.A. is a private company specializing in private equity investments in small and medium-sized companies. The Company's investments are not limited to specific industries, but most of them are in Polish companies. Thanks to its independence, high flexibility and maximally reduced formal requirements, the Company can make investment decisions much faster than any large private equity funds.

www.carlsonfinance.com

Carlson Capital Partners is an investment and advisory firm specializing in advising on mergers and acquisitions, transactions related to raising capital for non-public companies (private placement), pre-IPO, i.e. preparing companies to go public (e.g. into a joint stock company), advising on listing companies on the Warsaw Stock Exchange (IPO), trustee services, as well as services related to tax optimization of capital transactions, raising capital from venture capital and private equity funds, and financing of commodities and foreign trade

www.paymiq.com

Paymiq Financial Group Ltd is a Canadian fintech, creating tools to manage everyday finances for individuals and businesses in payment accounts, mobile banking, SWIFT payments, SEPA payments and a functional currency exchange platform. Paymiq Financial Group Ltd began operations in 4Q2022, offering EUR and GBP payment products for individuals and businesses at the start. Customers using their smartphone or tablet can open an account and make their first transfers within minutes of installing the application on their phone. The state-of-the-art biometric mobile technology used to support customer identification allows customers' data to be quickly verified and their use of payment services made available to them. The company is consistently developing the functionalities of its platform by working on the implementation of further products enabling payments in other currencies, foreign exchange transactions and the use of payment cards

www.helvexia.com

Helvexia PTE Ltd is a fintech start-up in Asian markets with an experienced team of international specialists familiar with the HELVEXIA is a new player in the fintech industry with ambitious plans for rapid expansion in Asian and US markets. The company is distinguished by an experienced team of international specialists familiar with both blockchain and cryptocurrencies, as well as the banking and payments industry. HELVEXIA focuses on creating tools to manage everyday finances for individuals and businesses. Blockchain and cryptocurrencies and from the banking and payments industry, creating tools to manage everyday finances for individuals and businesses

Carlson Ventures S.A. (formerly FSG S.A.) Spółka specializing in fund management and management of alternative investment companies. The subsidiary is the sole general partner of CARLSON VENTURES SPÓŁKA AKCYJNA ONE ALTERNATIVE SPÓŁKA INWESTYCYJNA SPÓŁKA KOMANDYTOWO AKCYJNA, which specializes in collecting assets from a wide range of investors for investment in accordance with the company's investment policy primarily in technology startups with an emphasis on Spacotech and Deeptech companies located in the US and Asia.

HELVEXIA PAY

Helvexia PAY Sp. z o.o. will operate in the field of payment services as a small payment institution. The subsidiary has not yet started operations, it is working on the development of a project aimed at establishing cooperative cooperation, implementing the technology necessary to operate in the financial market.

www.hotblok.pl

Hotblok Polska Sp. z o.o. offers an exclusive license for the production and sale in Poland of the HOTBLOK system, the simplest building erection system that saves a lot of time and reduces construction costs. The Hotblok system achieves truly impressive thermal insulation values in accordance with the latest guidelines, allowing it to meet the requirements of passive construction.

www.bloomvoyages.com

Bloom Voyages Ltd. The company is a premium travel agency, deals with "tailor-made" tourism. This means that events are prepared according to individual customer demand. Ultimately, the subsidiary will be based on a program supporting the creation of tourist offers based on an artificial intelligence module. This is to be an innovative tool created and developed by the Bloom Voyages team aimed at shortening the process of creating tourist events by automatically matching customer preferences with current opportunities considering risk factors such as political conflicts, climatic events, epidemiological situations, etc.

The strategic subject of the Issuer's activity is formalized consulting services, provided to Carlson Ventures International Limited (CVI), in the area of consulting in the following areas: acquisition of new projects, planning and implementation of "investment exits", negotiations with clients, preparation of contracts and documents, providing relevant legal consultations and legal representation, support in the search for potential investors, evaluation and consultation of projects with recommendations on the selection of the most promising companies with the greatest market potential .

The [CARLSON ASI EVIG Alpha](#) Fund was established four years ago in partnership with **Carlson Ventures International LTD** to invest in early-stage technology projects targeting R&D with the potential for global commercialization. Carlson ASI EVIG Alpha focuses on key industries for the modern knowledge economy, with a particular emphasis on issues using elements of artificial intelligence (AI) in industries such as: FinTech, MedTech, IoT and CleanTech.

To date, Carlson ASI EVIG Alpha has thoroughly analyzed 1,500 projects and invested 50 million in 42 Polish innovative startups.

The Carlson ASI Evig Alpha fund is actively supporting the startups in which it has invested, not only in business development, but also in raising further financing. To this end, it organized an "Investor Day" event on May 10, during which investors could learn about the fund's six portfolio companies. According to the board of Carlson ASI Evig Alpha, access to financing at the right time is fundamental to the development of a startup. Recognizing what is happening in the external environment, it has decided to support its portfolio companies very actively in cooperation with investors. In this way, he wants to make it easier for them to raise further funds for development. Out of the 40 startups in which he invested, six companies were selected that Carlson ASI EVIG Alpha believes are technologically and business mature for the next round of funding and scaling of operations. Startups that presented themselves to investors at the "Investor Day" on May 10 were:

AutonomyNow (AutoMotiv) - maker of a system to support the safety of city buses.

Playstrict (GameDev), a startup that has created a self-publishing platform for mobile game developers.

BABY.LINK (MedTech) - developer of a solution that enables 3D visualization of ultrasound results during pregnancy.

The Woof (PetTech) - maker of a smart collar that monitors the health of dogs.

Meetra AI (HRTech) - a startup that has created a solution to improve the efficiency of online meetings and remote work.

AI_SELLER (Data Analytics) - developer of a tool, using artificial intelligence, to optimize sales in the e-commerce channel.

May's "Investor Day" was the second event of its kind that Carlson Evig Alpha organized for its portfolio companies. The previous event was held in Q4 2022. The only startup presenting to investors at that time was medtech Nutrix, which recently successfully closed a second round of financing raising a total of PLN 8 mil (\$1.8 mil) to further develop the business in international markets, particularly in South America, and to continue research and development in Poland. In addition, Nutrix AG is accelerating business development in Chile, having received certification from CENS - Centro Nacional en Sistemas de Información en Salud. This milestone has made the Polish company part of Chile's public health care system and strengthened cooperation with the public insurer Fondo Nacional de Salud (FONASA).

Below is a presentation of projects from the CARLSON ASI EVIG ALFA portfolio:

MEDTECH

www.pelvifly.com

Pelvifly - pelvic floor muscle diagnostic and rehabilitation system. It is a wireless vaginal probe that allows multidimensional diagnosis of pelvic floor muscle structures and enables safe and effective rehabilitation both in the office of a medical specialist and at home, together with software for data analysis and interpretation (application and telecare system). The target group for the device is individual users (B2C) and doctors, specialists, therapists, rehabilitators (B2B)

www.enforcemed.pl/en

ENforce - the project will develop a commercially ready ENforce Bionic Foot prosthesis, which in terms of performance and business model will be far superior to products available on the market. The Enforce Bionic Foot prosthesis will provide an amputee with the most natural-like mobility. As a result, it will enable a person to return to normal daily activities, minimizing the risk of additional musculoskeletal problems developing over time, which are, in the case of traditional prostheses, the result of asymmetrical load distribution in healthy parts of the musculoskeletal system

www.nutrix.tech

Nutrix AI - is a Swiss medical technology startup that focuses on developing artificial intelligence software and algorithms to help monitor glucose present in saliva and treat diabetes. The startup's overarching goal is to use the full potential of artificial intelligence to give patients the ability to monitor their health in an easy, non-invasive, and painless way. The Nutrix solution aims to help people change the habits necessary to control obesity or manage a pre-diabetic condition.

www.biometricsecurity.pl

Biometric Security - the subject of the project is the design and development of a prototype system for aseptic and contactless human authentication based on biometric data of the subcutaneous vein system of the hand. The sensor will use illumination of the soft tissue of the hand with an appropriate wavelength to highlight the vein system

www.deventiv.com

Deventiv automatic intraoral scanner. DAOS - Deventiv Automatic Oral Scanner, when placed in the patient's mouth, will perform automatic imaging of teeth and gums with high accuracy, speed and without active participation of the operator, i.e. without active manual operation of the operator to perform the examination. The device's work will result in a standard 3D model of the mouth, in the form of a computer file, which is necessary for dental treatment planning. Deventiv was nominated in February in the 4th edition of the Start-UP-MED competition, which was a side event of the 7th Health Challenges Congress.

Emotional communication tool for people on the autism spectrum using gamification elements.

AI

A tool to increase sales efficiency and profits in e-commerce channels. **AI_Seller** is a project that wants to use machine learning capabilities to support sales in the e-commerce channel. The startup is working on an application in a SaaS model. B2B customers using it - e-commerce stores and marketplace platforms - receive predictions based on current sales data, indicating in real time which products, at what price and in which channel are currently worth offering to customers. The main goal of the **AI_Seller** solution is to increase conversion and improve the cost efficiency of the sales process in the e-commerce channel

Sensus AI - The goal of the originators is to create an application that will support processes that require decision-making related to human mental properties. The task of the author's application will be to create predictions of the personal properties of its user based on facial reactions evoked by video material presented on the computer screen. The subject will be presented with a set of videos and microexpressions will be recorded while watching them. With the support of machine learning, mental toughness and personality will be determined based on the Big Five model. The solution aims to reduce the time and cost of personality tests to determine personal potential.

BRUM - is a project whose target group will be **people planning to build a house or renovate an apartment**. The **recommendation platform** being developed by the originators, backed by artificial intelligence, is to be the place of first choice for each person at any stage of this process, prompting, recommending, and guiding users through purchasing processes, related to construction or renovation, presenting product and guide content. The system will offer, selected individually for each user, the most interesting bargains available on the market. It will be based on a subscription model. At the same time, the user will have to agree to profiling and go through a short preference test, which will allow tailoring the offer and the presented content to their individual needs.

PUMaA SYSTEM

The PUMaA System (Pressure Ulcer Monitoring and Analysis System) is a project that, using artificial intelligence and computer vision, is expected to identify skin lesions and, above all, chronic wounds - bedsores. PUMaA is to be in the form of a mobile application - which will support not only medical professionals, but also people taking care of chronically ill patients at home. The system created by the start-up will allow a person with no medical training to indicate the area of occurrence and assess the condition of the bedsores, while medical workers will help in the selection of dressing agents that, based on previous data, work best in each case.

Equinity Vision - the aim of the project is to develop a system for round-the-clock autonomous care of horses in stalls through the development of algorithms for detection and prediction of undesirable situations (including colic, mechanical injuries, etc.). Machine learning algorithms (computer vision) based on industrial surveillance cameras (CCTV) will analyze the behavior of individual animals, e.g., at what time the horse got up, how much it slept, breathing frequency, what is the level of mobility. The information obtained will allow further analysis and, as a result, alert the occurrence of undesirable events

Tasklytics - the premise of the originators is to develop a knowledge-based project decision support module. It will support users in their daily work by analyzing business processes, setting priority tasks for individual employees, and identifying so-called disruption influencers. The result of the project boils down to the implementation of business practice of Enterprise Information Management (EIM) system solutions. EIM systems are now one of the main analytical and planning tools used in the daily work of enterprises and in the day-to-day management of the company. The target group of the project is SME companies, while the main competitive advantage of the proposed solution comes from the fact that thanks to the correlation of processes and preliminary process models, it will be possible to determine the tasks that a given employee has on a given day and what will come out of the correlation, as well as what processes he or she will take part in.

DTC A tool for building 3D interior models from spherical images of any origin.

Timecube - offers solutions for intuitive user time control. With Timecube, participants can control each other's meeting time without the inconvenience of looking at each other or glancing at clocks

Hinter.ai - SaaS system for collecting and analyzing information in an organization. A set of standardized questions. Responses are given on a multi-level scale of acceptance and rejection (from full agreement with a given statement to disagreement) with the possibility to add comments and improvement ideas. The results of the survey consider the specifics of the organization

mKomornik - the aim of the project is to create a desktop application and a mobile application mKomornik, which will allow mobile access to the data and tools of a bailiff's office to optimize the work of a bailiff with the use of methods for recommending bailiff cases using machine learning algorithms. mKomornik is software for bailiffs' offices, which will include a website, a mobile application for the Android/iOS platform and the mKomornik database

CyberHeaven - encrypted video conferencing. The subject of the project is the creation of a secure, encrypted virtual meeting space allowing users to use multiple platforms, including web browsers and dedicated mobile applications for Android, IOS and HarmonyOS platforms. The product addresses solutions related to cyber security in communications

WalkSee - a tool for creating virtual walks using only the user's smartphone. The technological heart of the product innovation will be the "e-statement," a software solution for acquiring 360° spherical images using an ordinary smartphone camera. The technology captures high-quality images, alleviating the problems associated with imperfect human motor skills, so that the combined images give a full 360° spherical image of a room without imperfections

Z-RAYS the subject of the project is to produce an intelligent solution for efficient and ergonomic on monitoring of the mainframe environment in real time in order to optimize the efficiency of the IT specialist's work and improve troubleshooting time during the operation of mainframe systems. Monitoring will take place without significant impact on system performance and significant additional consumption of system resources with the support of Machine Learning algorithms.

MMPay - the subject of the project is a system for detecting forged documents using an artificial intelligence mechanism that detects elements that have been modified, i.e. forged that are invisible to the human eye (e.g. by mixing fonts in a single document, pasting single letters and/or words in place of real ones, forging signatures by pasting them from other documents, etc.). As a result, the system will discover patterns in invoices and analyze the document as an image to isolate suspicious areas indicative of possible forgery.

ePeer - Innovative P2P lending platform. It's a platform that connects investors and borrowers using artificial intelligence to solve the problem of liquidity - the inability to invest and borrow small amounts of money safely, easily, quickly. The object of the project is to develop an innovative scoring system that assesses risk using artificial intelligence as a tool for classifying groups of borrowers.

IoT

Connect4KIDS intends to create a comprehensive solution to diagnose and predict the development of postural defects in children, and to support teachers and coaches in selecting appropriate exercises for correction. Parents will be involved in the process and will receive information on the progress of the ongoing exercise program. The founders of Connect4KIDS plan that their solution will become a widely used tool in educational institutions

TRUE MOVES is working on a solution designed for lovers of classic watches who want to access the functionalities offered by smartwatches or smartbands. The company will develop and market a module integrated into the watch strap, providing functions such as communication with a cell phone, monitoring of physical activity, contactless payment, or localization of the watch.

Flotation Innovation - the subject of the project, on the other hand, is the development of a system using methods of artificial intelligence, controlling the process of spatial concentration, i.e., the technology of compacting plastics at low temperature, without degrading the material. The solution will be addressed to any entity that recycles or processes plastics.

playstrict.com

SaaS platform for GameDevs mobile studio using AI algorithms for planning, softlaunch optimization, Live-Ops and marketing campaigns

Debster.AI - a debt management system, using machine learning algorithms, will enable the creditor's business process to become more efficient. Ultimately, the product will make it possible to view, monitor, process, integrate data and notify of its dynamics based on a new method of recommending receivables for enforcement. The customer will be able, using the technology developed under the R&D project, to optimize the process based on the goals and costs set.

babylink.co.uk

A platform for visualizing and sharing 3D fetal models. The aim of the project is to allow parents-to-be to easily share the results of a 3D ultrasound with their loved ones, without requiring users to install additional applications on their smartphones. And, thanks to the created algorithms - combining incomplete images to create a corrected 3D photo. The results of the project will be tools and procedures that will allow to send 3D results from the prenatal examination, from the ultrasound camera to the cloud, where they will be refined and processed into a form that works online, in the browser - a high-performance 3D scene. The platform will allow the links created to be shared in a way of unprecedented accessibility. The goal of the project is to enable parents-to-be to easily share 3D ultrasound results with their loved ones, without requiring users to install additional apps on their smartphones. And, thanks to the created algorithms - combining incomplete images to create a corrected 3D photo. The results of the project will be tools and procedures that will enable the transfer of 3D results from the prenatal examination, from the ultrasound machine to the cloud, where they will be refined and processed into a form that works online, in the browser - a high-performance 3D scene. The platform will allow sharing of the links created in a way of unprecedented accessibility.

BSP unmanned rapid response system

autonomynow.com

AutonomyNow. His team has focused on the development of Advanced Driver Assistance Systems (ADAS). The solution will be dedicated to city buses that meet the criteria for Level 1 autonomy - a basic driver support system to enhance driver perception. The system will recognize and identify incidents in real time and inform the driver of potential dangers on the road

crushvibrotech.com

CrunchVibroTechOne is developing an IoT solution that will improve the efficiency parameters of the raw material grinding process, while reducing costs, by optimizing the parameters of the machines used in the process. In addition, the solution will enable remote fault prediction and reduce the need for servicing, as well as allow remote management of processes

apipay.pl

mPOS apipay - is a simple and comprehensive solution for accepting electronic payments. The technology used in apipay makes it extremely easy to operate the device. At the same time, mPOS gives you the opportunity to accept payments anywhere and anytime, under extremely attractive conditions

thewoof.co.uk

WOOF Smart dog collar. Monitoring location, activity level and health status. It will allow monitoring the pet's location, activity level and health status. The device, which is being developed by The Woof team, will be equipped with a few sensors monitoring not only the pet itself, but also its surroundings. All data collected by the system will be processed to create a profile of the dog, based on which abnormal changes will be caught - both those accepted by veterinarians and those individual to a given dog

seemore.co.uk/en

Seemore Aware - aims to create a solution to enhance motorcyclist safety by creating a spatial map of the road environment, recognizing objects on the road, and fully integrating with the helmet's heads-up display creating a solution based on full augmented reality - AR (Augmented Reality).

atstechnology.eu

ATS TECHNOLOGY - the subject of the research project is a new Ultra Convenience sales model, implemented in an innovative mobile retail container /pavilion, for which it is possible to achieve an average monthly profitability at the level of operating profit, higher than 5%. The purpose of the R&D project is to verify the functional, technological, and business assumptions of a new concept of 24-hour and unmanned sales based on a modular container store - Ultra Convenience.

whirla.co.uk

Whirla to manage and optimize shared office space- IoT in PropTech industry, enabling management of shared workstations in the organization space. The proposed solution will optimize the organization's hotdesk space considering employee comfort (preference), real-time monitoring of desk occupancy and reservation of hotdesk positions.

uavlas.com

Uavlas - a precision landing system for unmanned aerial vehicles. The subject of the project is the creation of a system for precise landing on the so-called "last meters" operating independently of weather and geolocation conditions, consisting of a ground-based transmitter (landing platform) and a lightweight on-board receiver on a drone (Plug&Play) and software that allows the system to operate with well-known autopilots

unicomm.tech

Unicomm - Residential Automation. Unicomm system for energy and thermal optimization of multi-family residential buildings, which is a "smart home" solution. The aim of the business is to popularize modern, comprehensive infrastructure solutions of the so-called "smart home" and to produce a simpler and more accessible system of home automation, which includes areas for managing lighting, heating, power supply of sockets - allowing you to turn off or on RTV/appliances. The heart of UNICOMM, is a designer control panel, which is also a **video intercom**

terrabilio.tech

TerraBio - a system for intelligent agricultural production. TerraBio will be a mobile genetic analyzer applicable to the agri-food industry for the diagnosis of pathogens of food, crops, feed, and livestock in < 35 min, along with a forecasting platform giving the ability to acquire information on the predicted growth of a pathogen in relation to weather conditions. The information will be readable on a smartphone, tablet, or computer via wireless and USB connectivity.

noelleled.eu

NoelleLED is a project to launch the production of a range of LED lamps, together with the construction of technical infrastructure that implements the functions of the Advanced Lighting Control System - enhancing safety at its application sites. Solve the problem of lighting and safety of roads and squares, providing an innovative, environmentally friendly, and cost-competitive lighting management system to help general lighting operators, including TSU managements, meet the statutory obligation to replace it with energy-efficient and low-efficiency emitting light sources

podioom.net

PODIOOM - is a SaaS platform supporting the trainer-trainer relationship and professionalizing the market for coaching and rehabilitation services. The podioom PRO application saves time for every personal trainer. Thanks to the calendar, CRM and automatic training reservation modules, the trainer saves at least 1 hour a day, which he can devote to the next training session with his charge. The podioom app is an opportunity to train with a professional personal trainer for every exerciser

2. SUMMARY OF REPORTS PUBLISHED BY THE ISSUER IN MAY 2023,

During the reporting period (i.e., May 2023), the Company published the following reports via the EIB system:

12-05-2023 | Current Report No. 11/2023 - Monthly Report April 2023

15-05-2023 | Quarterly Report No. 12/2023 - Interim Report for the first quarter of 2023

31-05-2023 | Annual Report No. 13/2023 - Annual Report for fiscal year 2022

During the reporting period (i.e., May 2023), the Company published the following reports via ESPI:

11-05-2023 | Current Report No. 8/2023 - Implementation of the consulting agreement.

3. INFORMATION ON THE ACHIEVEMENT OF THE ISSUE OBJECTIVES,

During the period covered by the report, the Company did not meet its issuance targets.

4. INVESTOR'S CALENDAR

June 28, 2023, Annual General Meeting of Shareholders will be held

By July 14, 2023, the Issuer's Management Board will make public the contents of the monthly report for May 2023.
